

Syed Zain Qalandar

Full Stack Developer

zainqalandar@gmail.com | 0336-4157981 | [LinkedIn](#) | [GitHub](#) | [zainqalandar.online](#)

PROFESSIONAL SUMMARY

Full-stack developer with 3 years of experience building scalable, responsive web applications using React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB. Experienced in REST API development, authentication, role-based authorization, SaaS dashboards, and performance optimization. Strong understanding of SSR, SSG, ISR, state management, and modern frontend architecture, with contributions to 50+ web development projects.

CORE SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js (SSR, SSG, ISR)

Backend: Node.js, Express.js, MongoDB, Mongoose, PostgreSQL, REST APIs, JWT Authentication, Role-Based Authorization

UI & Styling: Tailwind CSS, Chakra UI, Material UI, Framer Motion, Rizz UI, Figma to Code

State & Data: Redux Toolkit, Context API, REST APIs, Form, Axios, Zod

Tools & Practices: Git, GitHub, Docker, Postman, ESLint, Prettier, Stylelint, Vercel, Render, Cursor, OpenAI Codex

PROFESSIONAL EXPERIENCE

Independent MERN Development Projects

Jan 2026 – Present

Remote

- Developed secure RESTful APIs with JWT authentication, role-based access control, validation, middleware, and structured error handling.
- Integrated backend services with React.js and Next.js applications, managing API communication, database operations, and application data flow.
- Applied scalable backend development practices to build production-oriented full-stack applications.

MERN Stack Developer | [StepSharp Digital Pty Ltd](#)

Jun 2025 – May 2026

South Australia (Remote)

- Developed and maintained full-stack web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and Mongoose.
- Built reusable, responsive, and component-based user interfaces for SaaS dashboards and business applications.
- Developed and integrated RESTful APIs, implementing authentication, authorization, CRUD operations, validation, and database-driven functionality.
- Worked with Next.js SSR, SSG, and ISR to build performant and SEO-friendly web applications.
- Developed analytics dashboards, reports, filters, and data-driven modules for SaaS platforms and business workflows.
- Improved application performance using code splitting, lazy loading, dynamic imports, image optimization, and efficient state management.

- Developed responsive and pixel-perfect web interfaces using React.js, Tailwind CSS, and Material UI.
- Converted Figma designs into reusable, responsive, and cross-browser-compatible frontend components.
- Integrated REST APIs and handled application state and dynamic data across frontend applications.
- Collaborated on building and maintaining business websites, dashboards, and web application interfaces.

SELECTED PROJECTS

Read Al Quran – Full-Stack Islamic Platform & Admin Dashboard | [Next.js](#), [React.js](#), [TypeScript](#), [MongoDB](#), [Redux Toolkit](#)

- Developed a full-stack Quran platform featuring 114 Surahs, translations, Tafseer, audio recitations, Hadith, bookmarks, favourites
- Built a secure admin dashboard for managing users, analytics, feedback, reader activity, and broadcast notifications.
- Implemented SEO-focused features including structured data, optimized metadata, XML sitemaps, responsive PWA support, and performance optimization.

Live Demo: readalquran.online

ERPfy – Restaurant Management & Analytics Platform | [Next.js](#), [TypeScript](#), [Redux Toolkit](#)

- Contributed to a large-scale SaaS product for managing restaurant sales, orders, reservations, inventory, transactions, and staff operations.
- Developed interactive analytics modules, KPI dashboards, reports, and location/date-based filters with server-side data fetching.
- Improved application performance using dynamic imports, component optimization, efficient state management, and Next.js rendering capabilities.

Live Demo: [ERPfy Dashboard](#)

Propteq – Real Estate CRM & Property Management SaaS | [Next.js](#), [TypeScript](#)

- Contributed to a large-scale real estate platform covering property listings, leads, enquiries, sales, marketing, contacts, and agency management.
- Used Next.js SSR for authenticated, data-driven pages and improved dashboard performance through server-side data fetching, caching, dynamic imports, and optimized loading states.
- Built reusable listing components, advanced search and filtering, status management, agent assignment, pagination, and API-integrated workflows.

Live Demo: [Propteq](#)

EDUCATION

BS Information Technology

*2021 – 2025**Punjab University*

Intermediate in Computer Science (ICS)

*2018 – 2020**Hajvery University, Sheikhupura*
